

EXISTS: **WAMP**: Decoupling **application messaging** from **infrastructure** for multiple languages with transparent networking

“R2R” PROPOSAL:

WAMP with AP feature “R2R”: Decoupling **application messaging** from **infrastructure** for multiple nodes with decentralized trust

- 1) Clustering/HA**: special case R2R with *all* router nodes operated by *one* stakeholder
- 2) Point-to-point Integration**: special case R2R with *two sets of* router nodes operated by *two* stakeholders
- 3) Market Integration**: special case R2R with *N sets of* router nodes operated by *N* stakeholders

WAMP-R2R: Decoupling **application messaging** from **infrastructure** for multiple nodes with decentralized trust
